SUBJECT INDEX

BIOLUMINESCENCE
affinity chromatography 679
bacterial luciferase 671, 817
biophoton 283
chemical modification 817
chemiluminescence 251, 283
chiral discrimination 259
enzyme active center 817
flavin 817
free radicals 251
horseradish peroxidase 259
HPLC 679
infrared chemiluminescence 251
isobutyraldehyde 259
luciferase 671, 679, 817
luminescence 243, 283
oxygen consumption 243, 671, 817
oxygenated-flavin intermediate 817
phenols 251
photon-counting 283, 817
photophores 243
plant roots 283
protein/enzyme purification 679
proteins 671, 679
radical inhibition 251
sensitized luminescence 671
singlet oxygen 251
triplet acetone 259
tryptophan 259
two-dimensional imaging 283
ultra-weak emission 283
Vibrio fischeri strain Y-1 671
yellow fluorescent protein (YFP) 671

BOOK LIST 907

CONFERENCE REPORT 903

CORRIGENDA 909

ENVIRONMENTAL PHOTOBIOLOGY
action spectra 451
artificial radiation 479
cataract 489
corneal disease 489
damage to forest 209
development 577
Dictyostelium discoideum 577

vascular permeability 653
vitamin A 213

PHOTOMORPHOGENESIS

action spectrum 121
ADP-ribosyl transferase 799
Alternaria tomato 793
amino-terminal sequencing 113
anthocyanin synthesis 107
ATP-GTP-binding proteins 799
ATPγS 799
ATPase 799
blue light 793
chlorophyll *a* synthesis 263
chlorophyta 263
competition by nucleotide triphosphates 799
conidiation 793

Coulter counter 691
Cucurbita pepo 125
fluence-rate response curve 121
fungus 793
gene expression 121
green tissue 143
GTPγS 799
GTPase 799
hypocotyl growth 133
hypocotyl hook 133
immunoblot analysis 143
induction of conidiation 793
labile phytochrome 133
Lemna 799
light control 121
low fluence response 121
mustard seedling 133
mycochrome system 793
near-UV light 793
PEI-agarose chromatography 143
pertussis toxin 799
physiological mutants 107
phytochrome 107, 113, 121, 125, 133, 143, 263, 895
phytochrome action 133
phytochrome destruction 133
phytochrome photoconversion 125
phytochrome-like photoreceptor 263
Pisum sativum 113, 121
protoplast enlargement 691
protoplast sizing 691
quaternary structure 113
red and far-red light 263
size-exclusion chromatography 113
temperature 793
tetrapyrrole chromophore fluorescence 143
thiol-protease inhibitors 143
threshold response 133
tomato 107
Ulothrix gigas 691
Ulva rigida 263
very low fluence response 121

PHOTOMOVEMENT
automatic data acquisition 701
discrimination threshold 809
image analysis 701
light sensitivities 809
nonsulfur purple bacteria 809
photophobic response 809
phototropism 701
real time data processing 701
sulfur purple bacteria 809

PHOTORECEPTION
light gradients 895
light scattering 895
optical properties 895
photomorphogenesis 895
photosynthesis 895
phytochrome 895
tissue optics 895
Yearly Review 895

PHOTOSENSITIZATION
azide 55
benzopyrene 625
catalase 733
chlorin 175
cholinesterase 55
deuterium oxide 55
envelope proteins 351
eosin 55
Escherichia coli 733
fluorescence 169, 345
hamster kidney 351
hematoporphyrin derivatives 345, 367
Herpes simplex virus 367
in vitro photosensitization 175
iodide 55
ketoprofen 359
mutagenesis 367, 625
near-UV 733
oxidation 553, 625
oxygen microelectrode 175
photodamage 169, 359
photodegradation 359
photodynamic action 351, 367
photodynamic dye 175, 367
photohemolysis 55, 359
photoionization 733
photosensitization 175, 359, 553
phototoxicity 359
